

New Job Setup

1. Touch "Menu"

2. Touch "Start Job"

3. Touch "New Job", or "From File" to continue a job.

4. Change jobname if desired

5. Check "Product Application"

6. Touch "Next"

7. This screen appears only if "Swath Guidance" is selected on the previous screen. If so, touch one to choose guidance pattern.

8. Touch "Next"

9. See note or Touch "OK"

Note: If job requires setup of variable rate mapping, Step 9 is to touch "Next" and follow instructions on the *VPRO QSG Setup Prescription Maps*.

10. Touch "Application Rate Window"

11. Set each product node to "Auto"

12. Touch "OK" and get going!
